

YOU'RE INVITED TO A  
TELEHEALTH WEBINAR:  
**Telehealth TECH**  
**Security, privacy,**  
**software and hardware**

**THURSDAY 28TH MAY 7PM - 8:30PM**

**Moderated by**  
**Scott Arrol**

*CEO, NZ Health IT,  
NZHiT*

The NZ Telehealth Leadership Group (TLG) is hosting a series of webinars to help support providers who are implementing telehealth services such as phone or video consultations.

In this webinar we will start to explore the very big topic of what technology solutions are available to use for telehealth. Although the webinar will touch on the use of phone, it will focus mainly on video, and video consultations.

Panellists will discuss a broad range of topics including privacy, security, software and hardware.

- What privacy considerations do providers need to be aware of?
- Tips on security to minimise risk of online platforms
- What are the common software platforms providers are using in NZ
- Hardware solutions such as web cameras, mics, audio and lighting

**ASK A QUESTION:**

Prior to the webinar registered attendees will receive a short voluntary survey to get feedback on what solutions are currently being used, and what questions attendees have. These responses will be used in addition to the live Q&A and chat during the webinar.

**REGISTRATIONS REQUIRED**
