

Conporto Shared Medical Record View with reCare

Conporto connects to the numerous sources of patient data (eg. GPs, Hospitals, NZePS, Pharmacy, Ambulance). On request, Conporto retrieves a view of the patient information held by the various sources, that is combined into a single standardised summary.

Conporto does not extract or store data anywhere, it only provides a live view for the information that is held at source. Please note some data may not be available on Conporto if it is not recorded at the source, for example, test results not sent to the GP will not be available. It is advisable to always check the content with the patient.

Accessing Conporto in pharmacy

- 1) To access Conporto, you will need to have the reCare Pharmacy AppBar installed, the majority of NZ pharmacies have the reCare AppBar, used to receive their electronic prescriptions. If you do not have the AppBar installed, you can install it from <https://drinfo.co.nz/downloads/DriAppBar/>
- 2) Click on the Conporto icon on your reCare AppBar 
- 3) Enter NHI, confirm consent, “search” locations where data is found on this patient

- 4) Tick all locations you want to view, then view record summary
- 5) View aggregated patient summary. **Please note all Conporto access is audited.**
